Good evening Professor,

With reference to Question 1 under PS3, the number of assumptions is infinitely confusing (but more definitively in regression models...)

ATT

I'll assume the 10/01/2010 > 09/01/2019 data in the spreadsheet holds true.

- 10/01/2010 OPEN Px 28.85
- 09/01/2019 CLOSE Px 36.759998

BBY

I'll assume the 10/01/2010 -> 09/01/2019 data from public sources ALSO holds true

--

- 10/01/2010 OPEN Px 41.07
- 09/01/2019 CLOSE Px 63.650002 (as of the close on 08/30...).

I appreciate the finer details of these exercises, however, I will STILL require certain provisions under the DS Accommodations Treaty.

Namely under the scope of additional time...
